PROFESSIONAL SUMMARY

Full Stack Developer with 3 years of professional experience building enterprise web applications using ASP.NET Core, C#, and Angular. Skilled in designing scalable web architectures, reusable component libraries, micro frontends, REST and GraphQL APIs, microservices, secure authentication, and accessible user interfaces aligned with WCAG standards. Experienced in SQL Server, CI/CD pipelines (Jenkins), code quality tooling (SonarQube), and Agile Scrum delivery. Passionate about writing clean, maintainable code and delivering reliable software for international enterprise clients. Open to relocation for full-time Full Stack Developer roles worldwide.

TECHNICAL SKILLS

- **Languages:** C#, TypeScript, JavaScript, SQL, HTML5, CSS3
- **Backend:** ASP.NET Core, .NET Core, Web API, REST, GraphQL, Microservices
- **Frontend:** Angular, React.js, Reusable Component Design, Responsive UI, WCAG Accessibility
- **Database:** SQL Server, MySQL, NoSQL Databases
- **Security:** JWT Authentication, Role-Based Access Control (RBAC)
- **Tools:** Jenkins CI/CD, SonarQube, Git, GitHub
- **Cloud:** Basic exposure to Microsoft Azure, AWS
- **Methodologies:** Agile, Scrum, Code Reviews, Unit Testing

PROFESSIONAL EXPERIENCE

Software Engineer — Virtusa Client: *Brightly Software (a Siemens company), HealthStream (US Healthcare SaaS)*
Dec 2023 - Present | Full Stack Developer on enterprise SaaS platforms

Projects: Event Manager (Enterprise Event Management) and Asset Management Software — Siemens / Brightly, Credential Management Platform - Healthstream

- Developed and maintained enterprise-grade web application modules for Brightly's Event Manager and Asset Management Software, HealthStream's Credential Management Platform using Angular and ASP.NET Core.
- Designed and implemented reusable Angular components and shared UI libraries to accelerate feature delivery across teams.
- Built and consumed RESTful and GraphQL APIs to support high-volume enterprise workflows.
- Contributed to a microservices-based backend architecture using ASP.NET Core and C#.
- Implemented secure authentication and authorization using JWT and Role-Based Access Control (RBAC).
- Delivered accessible user interfaces aligned with WCAG accessibility standards.
- Wrote optimized SQL Server queries and stored procedures for performance-critical modules.
- Improved code quality and maintainability through static analysis with SonarQube.
- Integrated and maintained Jenkins CI/CD pipelines for automated builds and deployments.

- Collaborated in Agile Scrum ceremonies — sprint planning, stand-ups, code reviews, and retrospectives — with distributed international teams.

Software Development Intern — Cappricio Securities

June 2023 – Aug 2023

- Developed web application features using React.js and PHP.
- Assisted with REST API integration and database development.
- Participated in debugging, testing, and deployment activities.

KEY PROJECTS

Event Manager — Enterprise Event Management Platform (Brightly / Siemens)

Objective: Deliver an enterprise event management platform enabling large organizations to plan, schedule, and manage operational events at scale.

Technologies: Angular, TypeScript, ASP.NET Core, C#, REST APIs, GraphQL, SQL Server, JWT, RBAC, Jenkins, SonarQube.

Contribution: Built reusable Angular components, developed backend microservices in ASP.NET Core, implemented secure JWT/RBAC authentication, and ensured WCAG-compliant UI.

Outcome: Contributed to a stable, maintainable, and accessible enterprise product used by international customers of Brightly / Siemens.

Asset Management Software (Brightly / Siemens)

Objective: Support an enterprise asset management SaaS product that helps organizations track, maintain, and optimize physical assets across facilities.

Technologies: Angular, ASP.NET Core, C#, REST APIs, GraphQL, Microservices, SQL Server, Jenkins CI/CD, SonarQube, Agile Scrum.

Contribution: Developed and maintained feature modules across frontend and backend, wrote optimized SQL Server queries, integrated CI/CD pipelines, and collaborated on code reviews to uphold quality standards.

Outcome: Helped deliver reliable, production-ready features for an enterprise-grade Siemens/Brightly product serving international customers.

Credentialing - Credential Management Platform (HealthStream - US Healthcare SaaS)

Objective: Provide healthcare organizations with a centralized platform to manage workforce credentials, certifications, licenses, and compliance.

Technologies: React.js, JavaScript, ASP.NET Core, C#, REST APIs, MYSQL, JWT, RBAC, Jenkins.

Contribution: Built frontend modules and backend services for credential tracking, compliance workflows, and user access management.

Outcome: Enabled healthcare clients to streamline workforce compliance and certification lifecycle management.

EDUCATION

Bachelor of Engineering

VSB Engineering College — Graduated: 2023

ADDITIONAL INFORMATION

- Languages: English (Professional Working Proficiency), Tamil (Native).
- Availability: Open to relocation and full-time on-site or hybrid roles.
